

UA3 & UA3 Plus

ONE PLATFORM. TWO PERFORMANCE OPTIONS

Built on the same proven platform, UA3 and UA3 Plus offer two performance options for different enterprise needs. UA3 delivers reliable, cost-effective performance for VDI, cloud applications, and everyday productivity. UA3 Plus delivers 49% higher CPU and 56% higher overall performance* for enhanced multitasking, local applications, and growing workloads. Together, they provide the flexibility to right-size performance while optimizing long-term IT investment.

UA3 VS. UA3 PLUS — FIND THE RIGHT FIT

Item	UA3	UA3 Plus
CPU Platform	AMD Ryzen™ Embedded R2312 2 Cores / 4 Threads	AMD Ryzen™ Embedded R2314 4 Cores / 4 Threads
GPU	AMD Radeon™ Vega 3	AMD Radeon™ Vega 6
Positioning	Reliable and efficient endpoint for everyday enterprise and cloud-first computing.	4-core upgrade for mainstream users who need more processing headroom
Performance	Reliable Everyday Performance* • CPU Performance: 4,099 • Overall Performance: 1,025	Elevated Performance* • CPU Performance: 6,107 / +49% • Overall Performance: 1,596 / +56%
Ideal Workloads	• Daily VDI / DaaS deployments • Office & task-based users • Everyday enterprise workloads	• Banking: Security, authentication & local apps • Healthcare: Peripherals, authentication & apps • Rich Content: Media & multi-display
Why Choose?	The right balance of reliable performance, cost efficiency, and scalability for modern workspaces.	more applications and services run locally and simultaneously, requiring additional processing capacity without moving to a higher device tier
